

近十年期刊論文

1. Chang, D.W., Cheng, S.H., Chiu, M.C., Ge, L. (2025) "A study on subsoil and pile reactions of embedded piled raft foundations in loose sands under vertical loads, *KSCE Journal of Civil Engineering*, March 10023.
2. Chang, D.W., Zheng, W.C., Cheng, S.H., Tseng, C.Y., Ge, L. (2025) "Serviceability performance of piled raft foundations under vertical loads in clayey and sandy soils", *Soils and Foundations*, JGS, 65(4), August 101650.
3. Chang, D.W., Lin, J.H., Cheng, S.H., Ge, L. (2024) "Dimensionless reaction coefficients for embedded piled raft foundations in soft clays under vertical loads", *Int. J. of Geomechanics*, ASCE, 24(4).
4. Jeong, S.S., Park, J., and Chang, D.W. (2024) "An approximate numerical analysis of rafts and piled rafts foundation", *Computers and Geotechnics*, 168, 106108.
5. Omarov, A., Zhussupbekov, A., Kaliakin, V., Chang, D.W. and Dhanya, J.S. (2024) "Comparison of the results of different types of static pile load tests to predict the pile load capacity", *Journal of Applied Science and Engineering*. 28(1).
6. Chang, D.W., Chou, T.M., Cheng, S.H., Ge, L. (2024) "A two-dimensional hyperbolic spring model for mat foundation in clays subjected to vertical load", *Geomechanics and Engineering*, 37(5) 527-538.
7. Chang, D.W., Lu, C. W., Tu, Y.J. and Cheng, S.H. (2022) "Settlements and Subgrade Reactions of Surface Raft Foundations Subjected to Vertically Uniform Load", *Applied Sciences*, 12 (11), 5484.
8. Chang, D.W., Huang, D.W., Lin, Y.K., Lu, F.C., Kuo, C.J. and Zhussupbekov, A. (2021) "Length Influences on Lateral Performance of Barrette from Three-Dimensional Finite Element Analysis", *J. of Applied Science and Engineering*, 25(4), 577-591.
9. Chang, D.W., Li, J.F. and Lin, Y.S. (2021) "Assessments of Soil Parameter Reduction Coefficients from One-Dimensional Ground Response Analysis", *Geotechnical Engineering*, Journal of the SEAGS & AGSSEA, 52(4), 70-77.
10. Chang, D.W., Hung, M.H. and Jeong, S.S. (2021) "Modified Lysmer's Analog Model for Two Dimensional Mat Settlements under Vertically Uniform Load", *Int. J., Geomechanics and Engineering*, KGS, 25(3), 221-231.
11. Chang, D.W., Lien, H.W. and Hung, M.H. (2020) "FD Analysis on Piled Raft Foundation Settlements under Vertical Loads", *Geotechnical Engineering, Journal of the SEAGS & AGSSEA*, 51(2), 159-165.
12. Cheng, S.H., Liao, H.J., Chang, D.W. and Quo, L.H. (2019) "Effect of ground improvement on the lateral resistance of closed end steel pipe piles in a Coal Ash Pond", *Canadian Geotechnical Journal*, 57(7), 1058-1071.

13. Zhussupbekov, A., Chang, D.W., Utepov, Y., Brorgekova, K., Omarov, A. (2019) "Estimating the Driven Pile Capacities for COF Project in West Kazakhstan", *Soil Mechanics and Foundation Engineering*, 56(2), 121-127.
14. Chang, D.W., Lin, C., Wang, T., Lin, Y.K., Lu, F.C. and Kuo, C.J. (2019) "Three-Dimensional Finite Element Analyses of Barrette Piles under Compression and Uplift Loads with Field Data Assessments", *Geotechnical Engineering*, 50(3), 58-73, SEAGS & AGSSEA Journal.
15. Chang, D.W., Lien, H.W., and Wang, T. (2018) "Finite Difference Analysis of Vertically Loaded Raft Foundation Based on The Plate Theory with Boundary Concern", *Journal of GeoEngineering*, 13(3), TGS, pp 135-147.
16. Yamashita, K., Shigeno, Y., Hamada, J. and Chang, D.W. (2018) "Seismic response analysis of piled raft with grid-form deep mixing walls under strong earthquakes with performance-based design concerns", *Soils and Foundations*, 58(1), JGS, 65-84.
17. Chang, D.W., Lee, M.R., M.Y. Hong and Y.C. Wang (2016) "A Simplified Modeling for Seismic Responses of Rectangular Foundation on Piles subjected to Horizontal Earthquakes", *J. of GeoEngineering*, 11(3), 109-121.
18. Chang, D.W., Lu, C.W., Lin, S.S. and Lai, J.R. (2016) "Dynamic Analyses for Seismic Performance Based Design of Geotechnical Structures with Examples in Deep Foundations", *Geotechnical Engineering*, 47(2), SEAGS & AGSSEA Journal, pp. 83-88.
